August 30, 2017

To Our Valued Customers:

**Announcement - PRE-INSPECTION OF USED MOTOR VEHICLES  
FOR AUSTRALIA**

The Department of Agriculture and Water Resources (DAWR), the Government of Australia accredits and approved Autoterminal Japan Ltd. (ATJ) as an offshore treatment provider for assurance of cleaning, pre-inspection and certification systems for used light vehicles from Japan to Australia.

ATJ's quality systems and processes provide assurance of cleaning and high quality standard of pre-inspection of used motor vehicles, that is considered effective in managing and mitigating biosecurity risks to facilitate the "safe" trade of used vehicles prior to export to Australia in accordance to the DAWR Instruction Guideline - Inspection of used vehicles (processed by approved offshore treatment providers).

The DAWR Pre-shipment inspection is a requirement from the government of Australia for all used motor vehicles that will be shipped to Australia, having your vehicles being inspection in the country of export would give ease for exporters and importers processing in Australia as the vehicle already complied to the Australia requirement prior to export.

ATJ is accepting DAWR pre-shipment inspection from 1<sup>st</sup> September 2017.

For more details, please feel free to contact Autoterminal Japan Ltd.
